Axis-D Pen System

The Axis-D pen system is a disposable, variable dose injection device designed for the use with a 3 ml cartridge. The elegant and compact Axis-D pen system is available as a high quality plastic version with a large range of ergonomic options for an attractive and colorful design.

The Axis-D pen system incorporates the following features:

- Dose adjustment from 0.01 ml to 0.80 ml
- Dose correction to avoid injection errors and loss of product
- Customizable to alternative dose increments
- Accurate dose reading with sliding window
- Multiple injections
- No rotating outer components during injection to prevent interference
- Manual injection
Instructions for the use of Axis-D

1 / Remove pen cap
2 / Set dose
3 / Insert needle
4 / Deliver dose
5 / Check display

Exemplary demonstration: We refer to the IFU of the sales product for the exact use of the pen
